

Report on Quality Improvement Data 2016

Coordination of care after hospitalization:

Goals:

- 1) to contact patients within two business days after discharge to reconcile medication and, to answer questions and plan follow up care.
- 2) to scheduled follow up care with the physician within 5 business days of discharge.

Practice out comes (6/1/16 to 9/30/16):

- 1) Average days to contact = 1.3, none great than 2 days
- 2) Average days to visit = 3.4, none greater than 5 days

(There are not enough data points to meaningfully report these findings per doctor)

Providing of recommended services:

Goal:

For patients recommended to receive this service to receive it and to have it documented such that it can be pulled for report.
(Patients who decline to have a service are included as not receiving it.)
