

How to: Use Updox Video Chat

Your medical provider uses Updox Video Chat to communicate with patients. Video Chat is a safe and easy way to talk to your provider, often saving you a trip to the office.

Follow these step-by-step instructions to use Video Chat:

 <p>Megan, you have a secure Video Chat invite from Eric Hauter at Smart Chat Automation. Follow the link within 10 minutes to join the video chat: https://updoxtest.com/ui/video-chat/X62g8JgR9MI</p>	<p>An invitation to Video Chat will arrive on your device via text message or email. Click the link to be taken to the Secure Video Chat environment. You will have 10 minutes to click the link.</p>
 <p>myupdox.com wants to use your camera</p> <p>Block Allow</p>	<p>The first time you use Video Chat, your device may ask for permission to use your camera and microphone. Please allow access.</p>
 <p>Video Chat 00:03</p> <p>The screenshot shows a video chat interface with a doctor in a white coat and glasses on the main screen, and a smaller inset of a female provider. At the bottom, there are icons for microphone, camera, and a red phone icon to end the call, along with a volume slider.</p>	<p>You will be taken directly into a video chat session with your provider.</p> <p>The microphone and camera buttons will pause the audio and video you are sending. The red “phone” button will disconnect the chat.</p>
